This modular system is designed for IKEA SKÅDIS pegboards and includes holders for both phone chargers and cables.

The charger holder is designed around the European **Europlug (CEE 7/16)** standard, commonly used on phone chargers and other small electronic devices in continental Europe.

The system uses a separate SKÅDIS hook that fits firmly into the pegboard. Three holder variants are included to compensate for small differences between printers and materials:

- **Loose Fit** – easier insertion and removal.
- **Close Fit** – balanced fit with good retention.
- **Tight Fit** – stronger grip and minimal movement.

The same hook can be used with both the phone charger holder and the cable holder.

All parts are designed to print **without supports**. The holders can be printed in their provided orientation. For the separate SKÅDIS hook, rotate/reposition the model so that the hook looks upwards.

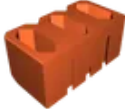

Printing recommendations:

- Layer height: **0.20 mm**
- Nozzle: **0.4 mm**
- Walls/perimeters: **3 or more**
- Infill: **15%**
- Supports: **Not required**
- Material: **PLA or PETG**

Because tolerances vary between printers, materials and slicer settings, I recommend printing the close fit and changing if it does not work for you.

Happy printing!
