The Logitech MX Keyboard Station acts as a stand/mount for screens and notes on your desk. You can use it as a standalone workstation using a tablet for writing, studying or everyday tasks. You can also use the holder to keep your smartphone visible or place instructions and reference notes beside the keyboard.

For people who would like to extend it's capabilities there are there are mounting points at the back that use 3 mm heat-set inserts, allowing you to attach custom accessories. Design your own holders, brackets or supports to suit your devices, workflow or individual accessibility needs.

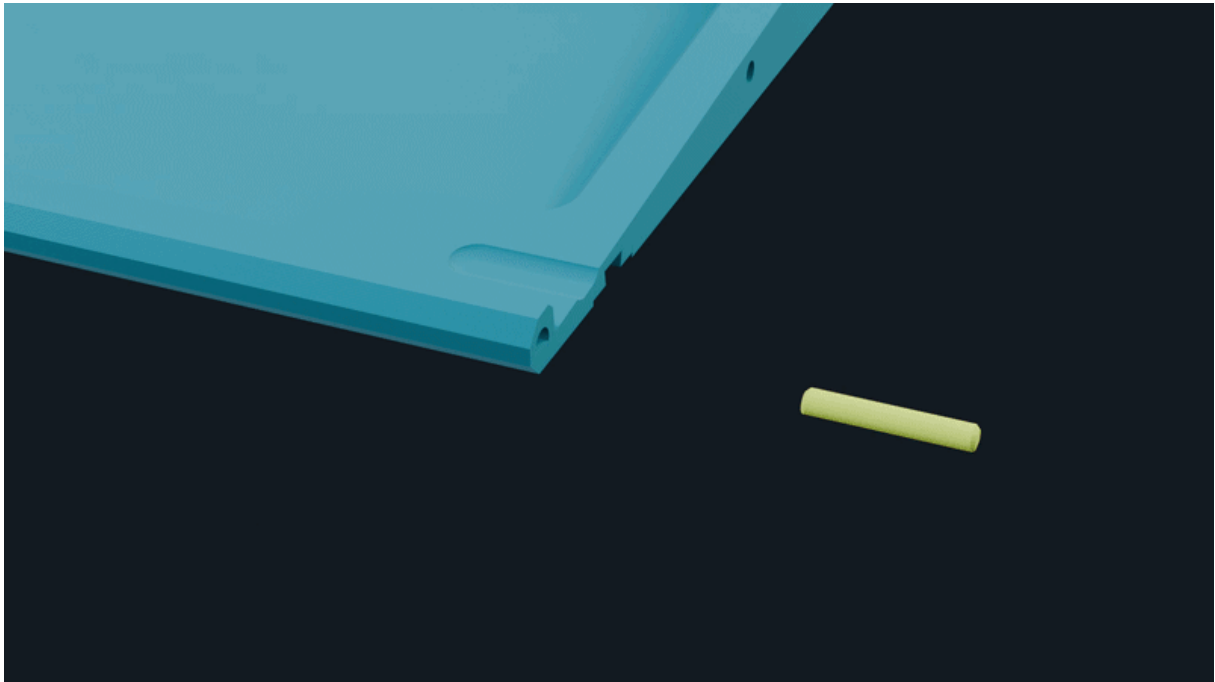

Features:

- Slot for Mounting Tablet, Smartphone
- Printable Plates for Attaching Notes
- TPU Feet

- 3mm Heat Insert Mounting Holes for Accessories
- Space below the Keyboard storing small items.
- Access to On/Off button and USB-C charging port.

Assembly:

Glue recommended between the 2 parts and TPU feet.
