I've included 2 versions of the model: the simplified one that has a g-code and one with an extra wall for added thickness on the inside.

If you are going to scale it down definitely use the one with extra thickness as the standard one is rather uniformly thin though it prints without any issues at 100% scale.

The second version also has many of the details as separate shells so they can be fill-painted easily for those of you with fancy multi material/color capabilities ;)
