Tags: [tool](#) [holder](#) [shovel](#) [bracket](#) [broom](#)

The **Sturdy Garden Tool Holder** is a simple and practical wall-mounted storage solution designed to keep garden tools organized and easily accessible. Its robust design securely supports a variety of handled tools, including spades, shovels, brooms, rakes, and similar equipment.

For best printing results, print the model **flat on its back**. While the internal curved sections will require support material, the amount of support needed is minimal and results in a strong, clean print.

For outdoor use, **PETG is the recommended material** due to its improved UV resistance, weather resistance, and durability compared to standard PLA. This makes it well suited for garden sheds, garages, workshops, and other environments exposed to changing temperatures and moisture.

Recommended Print Settings

- Material: PETG

- Print Orientation: Flat on the back
- Supports: Required for the internal curved sections
- Infill: 20–30%
- Walls/Perimeters: 4–5 walls for added strength

A simple, durable holder designed to keep your garden tools neatly stored and ready for use
