Travel version of poker chips with self-locking case holding at least 45 chips. The case is designed to hold at least 45 chips.

I printed 5 sets with 10 each of 1, 5, 25, 50 and 4 100 chips per set. I also printed 1 Dealer (D), 1 Big blind (B), and 1 Small blind (S).

The case is made to self-lock when the top and bottom is pressed together and the easiest way to open is to squeeze lightly on the side while pulling the top and bottom apart.

The chips and case top and bottom were all printed in PLA on my MK3S+ with MMU3 with 0.4 mm nozzle and 0.20 mm quality setting.

I have made an extra top for ColorMix of the text on the side, but are a bit late for the competition so I have uploaded the design before I have had

the chance of printing this part my self. The plan is to print it with 0.15 mm quality setting as suggested for ColorMix.

For full disclaimer, the cover picture is made with AI.
