Summary

A little tribute to the legendary Manta & Golf tuning era.

Tags: knob golf gear shifter manta th8s

Remember the days when a **golf ball on the gear stick** was part of the ultimate Manta or Golf setup?

I recreated this classic tuning look as a **3D-printable shifter knob for the Thrustmaster TH8S**. The golf ball shape and dimples give it the unmistakable retro look while making it a fun and comfortable addition to a modern sim racing setup.

The knob **screws directly onto the original threaded TH8S shifter rod** – no modifications required.

Features

- Inspired by classic **Manta & Golf tuning culture**
- Golf ball design with realistic dimples
- Direct screw-on installation
- Made for the **Thrustmaster TH8S**
- Designed for easy 3D printing

- Retro style meets modern sim racing

A bit of nostalgia

From the parking lot of the local tuning scene to your sim racing rig.
