A tool holder with a little secret

I've optimized this version to require fewer supports, make assembly easier, and include a texture around the entire outline of the model.

Designed for IKEA SKÅDIS pegboards, this organizer keeps your tools, pens, and accessories within easy reach... while hiding a secret drawer beneath the main compartment!

Once closed, its fluted front blends seamlessly into the holder's design. Perfect for discreetly storing a few banknotes, coins, or small items.

Whether in your workshop or above your desk, its clean design and vertical lines add a decorative touch to your space.

At first glance, just an ordinary organizer. The secret is yours to keep 😊
