### Summary

A Thrustmaster TH8S Shifter Knob with interchangeable tops.

[Gadgets](#) > [Video Games](#)

Tags: [knob](#) [racing](#) [shifter](#) [thrustmaster](#) [th8s](#)

A traditional style shifter, 45mm diameter, with a screw on top so you can make logo changes, colour changes, other changes. :-) I've included several caps

- 1) Thrustmaster logo.
- 2) #6 for the Ford GT40 that won Le Mans back-to-back in 1968 and 1969.
- 3) Formula One logo
- 4) Ford Logo
- 5) Lotus Logo

I used

- Nozzle size: 0.4 mm
- Layer height: 0.15 mm
- 5 perimeters
- Material: PLA

- Printer used: Prusa Core One

I've also included a version with a compartment in the base. This would allow you to add weight to the shifter for a heavier feel.
