Summary

Every great racer knows the cone is both the enemy and the destination. Now you can hold one.

Cone of Shame

This is a traffic cone shifter knob made for the Thrustmaster TH8S. It's silly to look at, but it's designed to be used. The tapered shape fills your palm, and the wide base gives your hand a natural rest while you row through the gears.

Features

- Fits the Thrustmaster adapter
- Printable without supports (print base-down)
- Wide base for a stable, comfortable grip
- Works best in orange PLA or PETG

Print settings

- Layer height: 0.2 mm

- Infill: 15%
- Supports: none
- Wall count: 3-4
