Gear Unclogger

Every sim racer knows the feeling. The race is going fine, then you miss a gear and everything backs up. You need a professional. It's ridiculous to look at and comfortable to use, and it does a surprisingly good job of making every shift feel like a plumbing emergency.

Print settings

- Filament: TPU
- Layer height: 0.2 mm
- Infill: 15%
- Supports: yes, if printing with the cup down
- Wall count: 3-4

Assembly

- Print and screw onto the provided adapter that Thrustmaster has provided
