Summary

Case for storage of Insulin pen of KwikPen type and new and used needles

[Healthcare](#) > [Home Medical Tools](#)

Case that fit a KwickPen and both new and used needles until you get home and can dispose of them safely . New needles are stored tip down and used needles tip up. As the pen slot is a little longer than pen to make it easier to take out you can place a small peas of foam in the end to prevent pen from rattling in the case if it disturbs you. Se picture 2. Print in place. I used semi translucent PLA so the infill shines through as I thought it gave it a nice look. You can off cause use whatever colour you like :)
