Summary

Minidisc Storage system to hold 18 Minidiscs in cases. If you need more, simply stack another one! HiFi Separates

[Gadgets](#) > [Other Gadgets](#)

Tags: [stackable](#) [storage](#) [stack](#) [hifi](#) [minidisc](#) [minidisk](#)

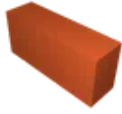

A Minidisc Storage rack that can grow with you collection - designed initially to store 18 discs with cases. As soon as you fill it, simply add another to the stack - it will end up looking like a hifi separates system for your minidiscs.

3 Files in total:

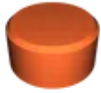

- a) The Box itself
- b) 4 x Feet
- c) The Minidisc Logo - (Load into your slicer and scale X & Y to 20%)

I left these separate as you may not wish to print it on every piece. It also allows you to create the Logo in different colours to match for your mood - I think Silver with Silver feet, or Gold with Gold Feet works best.
