Turn your cordless drill or power drill into a practical mixer with this 3D printable Drill Mixer Attachment!

Designed for quick and easy mixing of a wide range of materials such as paint, plaster, grout, mortar, cement mixtures, adhesives and other DIY materials.

The mixer attaches directly to a standard drill chuck, making it a simple and affordable alternative to a dedicated mixing tool.

#### Perfect for:

- Paint and primer
- Plaster and joint compound
- Tile adhesive and grout

- Mortar and cement mixtures
- Epoxy and other viscous materials
- DIY, workshop and home renovation projects

### Why print it?

- Uses a tool you already own
- No dedicated mixer required
- Quick to install and remove
- Great workshop and DIY accessory
- Easy to print and replace
- Useful for home renovation and construction projects

**Important:** Always start at low RPM and increase the speed gradually. Use appropriate safety equipment and make sure the printed part is securely mounted before mixing.

Happy printing and mixing!
