Summary

You can hang stuff on the hooks and clip notes under the bottom hook, which work as a clip.

Simple but mighty accessory for the IKEA SKADIS board.

You can hang stuff on it and you can clip paper with it. Not much filament required, no support needed to print.

I tested only on a 3d model of the board, feel free to let me know if it works with the real IKEA board!

The first image is AI generated based on a screenshot from my CAD window.
