updated 8. 10. 2026 | published 8. 10. 2026

Summary

Adds fixing holes to receive a 4mm countersunk screw allowing the mechanism to be rigidly mounted to a surface

[3D Printers](#) > [Prusa Parts & Upgrades](#)

Modification of the end stops for the Filament Spool Holder (By JERRY) to include fixing holes for a 4mm countersunk screw.

This is to allow the whole mechanism to be rigidly mounted to a surface, such as the roof of an IKEA LACK enclosure.

This remix is based on

Filament Spool Holder
