This is a Lamp Base for my Flying Saucer Build:

It Spins:

<https://www.youtube.com/watch?v=EheJpOS5FZY>

This is a relatively easy two color print. Or you can print the Base and Shade separately and glue them together.

This is the LED Lamp I used: <https://www.amazon.com/dp/B0DDTQ1GV5>

The LED Lamp presses into the bottom and holds firm.

I used a Clear Pla for the shade: <https://www.amazon.com/dp/B0CZRYLNBV>

The base and shade were printed with a standard .200 setting. No supports necessary.

The base had a 15% infill and the shade was printed at 25% (Gyroid). The Gyroid gives it kind of a crystal effect.

Enjoy
