Your pegboard doesn't need to be mounted to the wall only. With this stand, you can turn one panel into a practical stand ready to be enhanced by different shelves, hooks, and accessories.

Turn it into a stand for your headphones or tablet. The possibilities are endless.

*Print with supports

The stands are plugged from the back of the plate. On the front side, there are also counter plugs that secure the connector in place and hide the hole to create a more seamless and smooth surface.

Do you need accessory for this stand? Try my office bundle: Click-in system

Click-in mounting system for SKADIS accessories: the holder snaps in from one side and the cover locks it from the other, creating a secure fit.

This stand is compatible with this specific pegboard:
