Summary

Compact flat ice scraper for car windshields with finger dimple and hang hole. Unprinted prototype.

Hobby & Makers > Automotive

A compact, flat ice scraper for car windshields with a finger dimple for grip and a hole to hang it on a hook or keyring. Modeled parametrically in CadQuery; one watertight body. Unprinted prototype: I have only checked the geometry digitally, I have not printed it yet. Please test one print first. Plastic scrapers are for light frost only; never use on dry glass. Print: PETG recommended (PLA gets brittle in the cold), 0.2 mm layers, 0.4 mm nozzle, 4 perimeters, 30% infill, flat as modeled, no supports.
