Summary

Desk stand for the Galaxy S22+ with a tunnel for the charging cable. Unprinted prototype.

[Gadgets](#) > [Portable Devices](#)

A desk stand made for the Samsung Galaxy S22+ (also fits similar phones of about the same thickness): the phone leans back at a viewing angle and a tunnel at the bottom lets the charging cable pass through. Modeled parametrically in CadQuery; one watertight body. Unprinted prototype: I have only checked the geometry digitally, I have not printed it yet. Sized for the S22+ without a thick case; measure your phone first. Not affiliated with Samsung; the name only states compatibility. Print: PLA or PETG, 0.2 mm layers, 0.4 mm nozzle, 3 perimeters, 15% infill, as modeled, no supports.
