Since I didn't like the similar models I found online at all, I wanted to create a tailor-made model for the PARKSIDE screwdrivers I own.

Here you can find the PBSA 20-Li A1 but in my profile you can also find 3 other models.

I cannot guarantee compatibility with versions other than those for which they were made but you can try at your own risk.

No supports are needed for printing and I recommend a little more strength on the profiles
