Summary

Simply device to stop Lavazza pods from crumpling

[Household](#) > [Kitchen](#)

Lavazza Nespresso coffee pods are excellent but have a tendency to crumple in coffee makers (DeLonghi Gran Lattissima). This affects the brewing of the coffee. This simple device pierces a single hole in the bottom of the pods which allows the pods to better deal with the pressure.

After printing (PETG preferred) superglue the metal part of a pushpin into the 1.3mm hole at the bottom. Simple push the piercer on pods to pierce a single hole.
