Summary

I bought the Charger because I got tired of the charging snake pit that was constantly lying around on my windowsill.

I bought the **Anker Prime Charger 200W** because I got tired of the charging **snake pit** that was constantly lying around on my windowsill. 😊

So I designed this little add-on to keep the cables under control and make the whole setup look a bit less chaotic.

Print Settings

- **Material:** PLA / PETG
- **Layer height:** 0.20 mm
- ⚙️ **Infill:** Structural
- **Supports:** not needed
- **Status:** Work in Progress

The model is still being developed, so improvements and new versions may come in the future.

Notes

Designed specifically for the **Anker Prime Charger 200W**.

If you have any suggestions or ideas for improvements, feel free to leave a comment.
