So this is more of a utility set to extend the CyberBase System, adding triangle tiles to make for more layout configurations.

Also included is a connecting peg piece which can be used in lieu of the original 5x3mm magnets intended to be used with CyberBase tiles.

So with any number of these printed out, you can now have a wider range of geometric configurations to better fit your display spaces!

Hope this will help extend the layout possibilities of the CyberBase System for y'all. Happy 3d printing! =)
