Summary

more flexible pelvis and new joints

Toys & Games > Action Figures & Statues

I wanted to make more flexible pelvis so the thighs can bend more than 90 degrees. Then i sa that knees bend more than the should so i reverse engeneered the knee joints, then i did the same with elbows and forearms. All for more realistic snowboard grabs :P

Printed in abs with 0.15 layer height, with classic mode and inner/outer/inner
