Heyhooo

I designed a Case for my daughters FiiO Echo Snowsky MP3 Player.
I printed it out of TPU and also created a Clip (PETG or other stiff materials)
so you can hang the player onto your belt, trousers or other places.

It should fit perfectly and the player will sit very tight. - The buttons will be a bit harder to press but that is normal.

I have 2 versions of the case. 1 hole & 2 holes. We only use the 3,5 mm input. If you need the bigger one too you can use the version with 2 holes.

Also I added the STEP file of the player itself if you want to create your own Case.
Have fun!
