To expand my wife's existing SKÅDIS pegboard, I created this 3D-printed part, making full use of the Prusa XL's maximum size.

It also includes separate spacers that, like the original SKÅDIS pegboard, create a 2 cm gap from the wall.

Use screws (maximum diameter of 5 mm) to secure the pegboard through the spacers.

Printed with PLA

No Support

8 % Infill

0.2 mm Layer Height
