Add some playful underwater fun to your collection with this Flexi Piranha Toy, featuring big movable eyes and an articulated lower jaw for an extra funny and expressive look. Designed to flex, move, and pose, this quirky fish makes a fun fidget toy, desk companion, collectible, or gift for kids and adults. Perfect for ocean lovers, fish fans, and anyone who enjoys unique and entertaining 3D printed toys. --- I test all my models with default Bambu Lab slicer settings: 0.2mm layer height, 10% infill, tree supports. No complex tweaks needed. If a model requires special settings, I include a prepared 3MF file (rare).
