Tags: display mario nintendo figurine decor 3dprinting supermario 3dmodel printables bambulab ams

This pre-painted multi-color 3D model features Super Mario in his iconic victory jumping pose, mounted securely on a round display pedestal. Sliced for standard 0.4mm nozzles at a 0.2mm layer height, 2 wall loops, and 15% Gyroid infill, it requires automatic tree supports beneath the raised fist, extended boot, mustache, and cap brim for flawless multi-filament AMS printing.

Note: The included .3mf file features a reduced-color layout meant to serve as a guide for painting or filament coloring. Because this is an AI-generated model, the color assignment in the .3mf file may not fully match the rendered showcase images.
