Summary

Version 1 "No Hardware" Picatinny Receiver Blank. Perfect for remixing and modeling any kind of sight or scope you want.

Gadgets > Other Gadgets

Tags: blank receiver picatinny nohardware

This fully no-hardware receiver is designed for creating custom sights, scopes, and other rail-mounted accessories. Simply slide the receiver onto the rail and insert the locking pin to secure it in place.

Print Settings

Hardware Pin

- 1. 100% infill (To give it extra strength)
- 2. Print the pin on its side (Printing it pointing up like a flagpole will make it weaker)
- 3. Supports ON (Printing this correctly on its side will require supports)

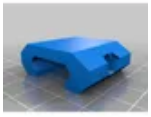
Picatinny Receiver Blank

- 1. Supports ON (Some printers won't require supports but I recommend you turn them on just in case)
- 2. Infill? Fully your choice (I prefer 100% infill because it is a tiny print and wont take long anyway)

DISCLAIMER

This Picatinny Receiver Blank was made for use on picatinny compatible nerf guns and is not for use on real firearms.

This remix is based on



Blank Picatinny rail
