Summary

model of a 3d printed car key that is broken off

Hobby & Makers > Automotive

Tags: car repair key suzuki reparation oldkeys

This project is a model built to repair a old key that was broken

Here are some printing notes:

1. The file"chiave.v6" has to have a pause at layer 21* to insert the key when the printer bridges.
2. If you still have the buttons still intact like me, you can use that one otherwise the file has the part for the key and you need to take the buttons from the old one the file is chiave v8 fin

*I use a stock 0.4mm nozzle at 0.2mm layer heigh so it can vary from printer to printer

Materials needed

screw m2.6x5mm

screw m2.3x8mm

original car key

Model files

chiave-finale.3mf

chiave-v8-fin.stl
