Tags: cc webcam housing carbon elegoo c2 cc1 centauri cc2

I recently got myself a C2 and had a spare CC1 camera lying around that I wanted to put to use. Since I couldn't find a suitable camera housing, I took inspiration from the original CC1 housing and a few other remixes, combined them, and came up with this.
You need 2 M2X6mm screws to secure the camera and 1 M3X6mm to screw the housing to the frame.
Please use Arachne wall generator and supports/sacrificial bridge counterbores holes.

This remix is based on
