Scottex Holder

This is a model built to hold a standard 200x150mm roll of scottex paper attached to the underside of the kitchen

I recommend using petg to print it if you plan to mount it near heat sources but if it isn't near one pla will work just fine.

There are two files **portascottex vFIN** and **portascottex** the vFIN version is the one big piece you might need to divide it using the dovetail joint option in the slicer; if you can't use it there is the 3mf file where it has been already done.

Materials needed:

2 woodscrews at least 30mm long and not thicker than 2,5mm

Model files

portascottex-vfin.stl

portascottex.3mf
