A custom deckbox for the new **Cyberpunk Trading Card Game** capable of holding 4x standard sleeved decks (40-50 card deck with 3 legends, and a 7 card sideboard).

No extra hardware is needed for the hinge! The hinge is designed for 3D printer filament, so all you need is a roll of filament for this print.

Parts Needed:

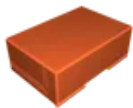

- CyberpunkX4Box_Lid
- CyberpunkX4Box_Body

Instructions:

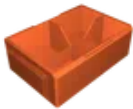

- Print each of the above parts
 - Align the lid with the body and feed filament into the hinge hole
 - Snip the end of the filament once fed in
 - Place decks into box
 - Close the deckbox lid (careful to not squish or bend any cards!)
