Classic Trucker Shift Knob for TH8S

A heavy-duty, classic "big rig" style shift knob for your Thrustmaster TH8S shifter. Featuring a vintage three-tiered stacked shape, it provides a solid, ergonomic grip that fills the hand perfectly. Whether you are hauling cargo in ATS/ETS2 or just want a retro, rat-rod vibe for your sim rig, this chunky shifter delivers an old-school feel.

Built for the standard Thrustmaster mount. The threads are modeled right into the base for a direct, adapter-free swap.

SIZE 62 × 62 × 110 mm (W × T × H)

PRINT SETTINGS

- **Orientation:** Upright / Threaded side down (best for clean threads and crisp details).
- **Layer height:** 0.12 (finer layers make a better thread and perfectly smooth rounded sections).
- **Walls:** 4-6, infill 50-80 % gyroid (a higher infill gives the knob a heavier, more realistic solid feel, which is especially nice for truck shifters).
- **Material:** PETG, ASA or PLA.
- **Color Tip:** **Vanilla White**, **Noctua Brown**, or **Galaxy Red**.
- **Supports:** None required.
