Summary

Arranges any square spice jars in grid. Tileable. Parametric for any jar dimensions & grid sizes.

Household > Kitchen

Tags: spice spicesorganizer spices spicejar

A grid to keep square glass spice jars neatly organized and from sliding around. Print me and glue me to your drawer with some double-sided tape.

This design tiles, so you can print it multiple times for more jars. You can also slice and recombine the design to create different arrangements.

Two ways to use this:

- A ready-made download for a 3x4 grid of spice jars measuring at most 44.5mm x 44.5mm, with approx. 10mm corner radius, with a lid of max. 48mm diameter.
- Fully parametric design, provided as a .f3d Autodesk Fusion file. The screenshot shows what parameters you can tweak.
