Summary

Combine two of your filaments in to one spool to maximize your storage room

[filamentspoolholder](#) [storage](#) [twin](#)

Combine two of your filaments in to one spool.

Make sure you print in a higher temp filament than you respooling on to the spool.

Check for clearance and scale it if necessary. Spool Diameter is 100.4mm and the model is 100.7. My PC Blend version was a little tight due to shrinkage.

Enjoy and maximize your filament storage
