1U rack mount for the Unifi Switch Enterprise 8 PoE (USW-Enterprise-8-PoE) and the Unifi Switch Professional 8 PoE (USW-Pro-8-PoE)

Originally made this for my Etsy Shop, but because of US-tariffs it was no longer feasible.

Until now there has been no official and easy way to mount this switch in a server rack. With this holder, the switch is simply pushed into the rails. For easy mounting, assemble the bracket without the switch, and install it into the rack, so that it is fixed in place. Then, unscrew the front, slide the switch in, and screw it all back together.

This uses 8x M4x16mm Screws to assemble the frame
