Tags: [holder](#) [stand](#) [laptop](#)

This model was created to fit on my small desk and hold my laptop high enough that I could put a book under and write whilst having my laptop on my desk

Technical Specifications:

The base is 15cm in width and length and the screw/bolt holes are 0.5cm wide.

How to assemble the stand:

1. First find a suitable sized bolt for both sides of the stand
2. Place the base on-top of the stand and then bolt the assembly together at the desired angle (Ensure the angle is not so that the device may topple over)

Please feel free to modify and edit the design for your own use case, some ideas I have recieved already are a slightly bigger base for so the stand could hold a wider laptop!
