Enhance your touring comfort on the **Kove 800X** with this windshield adjuster, designed to significantly reduce helmet buffeting and wind fatigue on long rides.

You will need:

- 4 M5x20 screws
- 4 M5x30 hex bolts
- 4 M5 nuts
- 4 rubber washers, 2mm or more in thickness
- 4 nylon washes m5

I have used this model to nuts:

And I use this model to work sliding profile with the m5x30 nuts:

- You need to use one washer between nuts and the windscreen.
- I have just printed with abs+
- 5 walls perimeter

- 40-50% to infill
