### Summary

Model profile for making custom mounts for the IKEA FÖRLIG Lamp

[Household](#) > [Other House Equipment](#)

Tags: [ikea](#) [lamp](#) [holder](#) [mount](#) [socket](#) [slot](#) [walllamp](#)  
[profile](#) [floorlamp](#) [forlig](#)

This model acts as a supplemental piece to be added on to other models to create custom mounts, holders, stands, etc for the IKEA FÖRLIG LED wall/floor lamp. (<https://www.ikea.com/us/en/p/foerlig-led-floor-wall-lamp-white-adjustable-color-80601291/>)

I had to get the profile right in order to make some desk clamps that I'm working on now, so I thought I'd share the basic shape so others can incorporate it into their models.

This secularly holds the FÖRLIG with a friction fit, just like the included base.

### Recommended print settings for PLA/PETG

- Layer height: 0.2 mm
- Infill: 15%
- Infill pattern: Grid
