Bring a little Christmas atmosphere to your desk with this 3D printed Christmas tree!

The model has two uses — it works perfectly as a standalone Christmas decoration, but you can also turn it into a cozy LED lantern by placing a small LED light underneath.

Features:

- Christmas tree decorative ornament
- Can be used as an LED lantern
- Decorative star on top

- Designed for 3D printing
- No supports required
- Great for Christmas decorations and gifts
- Perfect for a desk, shelf, nightstand or Christmas display

For the lantern version, simply place a small LED light underneath the tree. The open design allows the warm light to shine through the branches and creates a beautiful Christmas glow.

Tip: A warm-white LED gives the best cozy Christmas effect.
