Bring a touch of prehistoric fun to your space with this adorable Balloon T-Rex! This model is designed for both a fantastic look and a smooth printing experience. The main print profile utilizes 'fuzzy skin' to give the T-Rex a cool, textured appearance, which surprisingly also makes removing the supports incredibly easy. To ensure the dinosaur stands perfectly upright without tipping over, a modifier has been added to the feet with 80% infill, lowering the center of gravity. It makes for a perfect desk decoration, toy, or gift!

Print Instructions

- **Profile 1 (Fuzzy Skin - Recommended):** Provides the unique textured look and allows for very easy support removal. **Note:** This

model requires supports. Please be extra careful when removing the supports around the knot (the mouthpiece) of the balloon to prevent it from snapping off.

- **Profile 2 (Smooth / No Fuzzy Skin):** Included for those who prefer the classic, glossy balloon aesthetic. When using this profile, it is highly recommended to enable Adaptive Layer Height to achieve the smoothest finish on the curved surfaces.
- **Infill:** Standard settings for the body. The feet already contain an 80% infill modifier in the profile to add weight and stability.
- **Supports:** Yes (required). Carefully remove them around the smaller details.

I really hope you enjoy printing this model!

- The most rewarding part of 3D designing is seeing your results, so please drop a photo of your finished print below, I'd love to see how it turned out for you.
- If the print worked flawlessly, taking a few seconds to leave a review or a like is highly appreciated.
