Discover a highly dynamic, fully 3D-printable modular chain design! Whether you need a functional belt, a durable strap, a cosplay accessory, or just an awesome stress-relief fidget toy, this chain model is designed to adapt to a wide variety of uses.

Versatile & Universal: Perfect for cosplay, tools, decorative elements, everyday carry, or mechanical props.

Bed Adhesion is Key: Because of the detailed bottom surface area of individual links, proper bed adhesion is essential. We strongly recommend applying bed adhesives such as **3Dlac** or **MagiGoo** to your print bed before starting to prevent warping and detachment.
