No drill speaker mount system for acoustic panel walls.

Strong and simple system for screw mounted speakers or other items

No drilling needed, simply slot and twist the hook mount in place behind the slats, apply the top mount and screw together with the included M4 bolts.

Speaker is hooked onto the centre screw of the top mount.

Adjust bottom bracket to desired distance to cradle bottom of the speaker for additional support

fits acoustic panel with 13mm gaps and up between the slats

kit consists of

Top mount

Bottom cradle

6 x twist hooks

Needed:

M4 bolts x 6

6 x threaded insert

M4 nut to lock the centre bolt in place

Please like, download and review :)
