Summary

just a quick and easy mount for a motorcycle to hold a flipper zero

Hobby & Makers > Automotive

Tags: mount phone garage handlebar motorcycle flipper flipperzero flipperzerocase

this is a mount for a flipper zero that will mount to a 1" handlebar of a motorcycle or bicycle. it uses filament as hinge and 2 screws, either an m4 or 8-32 approximately 1.75" long with the corresponding nuts. i reccomend printing both pieces on their side for maximum hinge and flipper retention strength.

petg or better for heat resistance and outdoor protection.
