Summary

Two piece rocket case to store usb stick.

Household > Office

This is a project that was made to store my USB sticks for school (while looking cool) and being able to hook onto my bag.

Print Settings:

- This project was made with the intention of using TPU to get a softer feel
- Supports will be neccessary in the print, however I would recommend orienting the object in the slicer to avoid the amount of supports neccessary as TPU supports may be hard to remove
- Tolerances for the area the usb fits in has been accounted for.
- Print at a slow speed to avoid stringing
- Use multicoloured printer to account for the different colours

Function:

- Will fit a USB drive in the main compartment and will star secure once the lid has been placed on
- The hole on one of the fins allows it to act as a keyring to hang to your bag or lanyard and stop it getting lost
- Design can be adapted to store other items such as SD cards
