I bought a APC AP7721 missing the original rack ears, so I made that replacement part.

NOTE

1. **I'm not responsible if this part breaks, which could damage the ATS and connected devices.**
2. I recommend placing something underneath the unit, such as a UPS, to support it. However, this is not mandatory.
3. I recommend printing with ABS, ASA, or a blend such as ASA-GF. While these are not the strongest filaments, they can withstand higher temperatures.
4. I recommend printing it vertically, in the same orientation in which it will be installed. The holes have been adjusted for printing in this orientation.
