a waste/trash/dust bin that is comprised of three parts. The main part is the base, the top, and the lid. The lid moves/ rotates when one side is pushed down. It is pretty easy to assembly, the top simply sits on top of the base, and the lid slides into holders in the top. I designed this because I was tired of having to go downstairs to throw out my trash so I figured it would be best to simply make a trashcan I can have near my desk.
