Tags: [stand](#) [phonestand](#) [phone](#) [iphone](#) [android](#)

Phone Stand with honeycomb structure, it also has a place for charging your phone.

I recommend you print this on its side, I printed it with some custom supports. However, I don't think you'll need supports if you print it on its side.

I printed it with PLA on an Ender 3 v2

I've tested it with apple and android devices. It even works with a Nintendo Switch!

Please note, My model is not to be printed and sold.

Update 2023/08/10

Added Phone Stand Thicker.stl

I have added a slightly thicker version where the walls between the honeycombs are thicker.

Refer to red phone stand in photos.
