Chevrolet Bel Air 1957 is a scale model STL 3d printable of a real civilian classic car, ideal for display and diorama projects. Print it to build a vintage auto collection, recreate a 1950s street scene, or add a highly detailed car centerpiece to your model-building hobby. The file is a print-ready 3d model prepared in a slicer before publishing, so you can start with confidence for the first layer. Sliced with 0.20 mm layer height, a 0.4 mm nozzle, 15% grid infill, 2 wall loops and PLA (supports: tree(auto)). Profile prepared on a Bambu Lab A1. Scale - 1:10. You also get the 3MF project file, not just the raw mesh.
